DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on December 19, 2003 has been entered.

Election/Restrictions

Claims 2 – 38 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election of claim 1 was made **without** traverse in the reply filed on March 31, 2004.

Allowable Subject Matter

The indicated allowability of claim 1 is withdrawn in view of the newly discovered reference(s) to Goldman et al. (US 5,562,646). Rejections based on the newly cited reference(s) follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Goldman et al. (US 5,562,646).

With reference to claim 1, Goldman et al. (hereinafter "Goldman") discloses an absorbent core for an absorbent article, said absorbent core comprising a blend of fibers including a first group of short (col. 38, lines 38 – 41), high-denier (col. 38, lines 41 – 43) hydrophilic fibers (col. 38, lines 45 – 54) and a second group of longer (col. 38, lines 64 – 65), lower denier (col. 39, line 21), moisture insensitive (col. 39, lines 31 – 32) crimped synthetic fibers (col. 39, lines 39 – 40), said second group of fibers making up at least about 5% of the absorbent core, by weight (col. 38, lines 24 – 25), and said absorbent core being compressed in a substantially dry condition to a density of at least about 0.09g/cm³ as set forth in col. 39, line 64 to col. 40, line 1.

Despite the fact that the applicant has only claimed a lower denier not being relative to any other denier, Goldman discloses that the first group of fibers may have a denier of 15 and that the second group of fibers may have a denier as low as 1½ thereby providing the first group with a low denier and the second group with a lower denier.
